

Barricade Ltd manufacture and supply a range of mild steel bollards that offer a cost effective, strong, anti-vandal security solution. Mild steel bollards can be used as anti-ram protection for shop fronts, garage forecourts and countless other situations where perimeter protection is required. Steel bollards are also an effective method of traffic control on large car parks, retail parks and numerous other locations where the restriction of traffic is required.

Features / Options:

- ▲ Available in static and removable formats
- ▲ Base plate or root fix options available
- ▲ Round or square options
- ▲ Diameters from 50mm to 300mm
- ▲ Anti-Ram, re-enforced options
- ▲ Reflective tape available on request
- ▲ Galvanised to BS EN ISO 1461 as standard
- ▲ Powder coated in vast range of BS or RAL colours

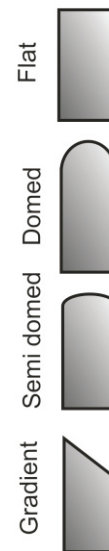

Steel bollards, galvanised finish.

Steel bollards, finished in black.

Head Types:

Mild steel bollards are available in galvanised only, primed only or galvanised with a painted finish.

Once finished, mild steel bollards can have contrasting retro-reflective strips applied for extra visibility, whilst the top caps can be either fitted or supplied 'loose' allowing for concrete filling on site. The types of heads available are shown above.

If you have any questions, or require further information regarding our mild steel bollards, or if you require a bespoke bollard then please contact our sales team.
