

Recycled plastic bollards offer an economical and virtually maintenance free access control solution and are extremely environmentally friendly due to the bollards being manufactured from 100% recycled plastics. Available in a choice of many designs recycled bollards can be used in numerous situations.

Recycled bollards are an economical and low maintenance access control solution

Features / Options:-

- Available in static and removable formats.
- Reflective banding available in various colours.
- Extremely low maintenance.
- Weather proof.
- Highly durable material
- Environmentally friendly.
- Economical access control solution

Made from 100% recycled plastics

Recycled bollards can be utilised on a variety of landscapes such as parks, car parks, rural environments and playgrounds.

As well as offering a cheaper alternative to our mild steel bollards and stainless steel bollards, they also offer the added benefit of knowing that you are doing your bit for the environment.

Flat top recycled bollard with twin recess

Round top recycled bollard with twin recess

On our website you will find a wide variety of finishes available to recycled bollards, including various head types, reflective banding options and recesses.

Timber bollards can also be used as a similar environmentally friendly bollard type.
