

Barricade Ltd's Telescopic security posts provide the secure protection of your premises as well as access control to any car park or forecourt, offering traffic and parking restrictions. Telescopic posts provide sturdy physical protection as well as acting as a visual deterrent.

The telescopic post is raised vertically out of the ground and locks in the upright position with an integral high security push button locking mechanism.

Features / Options:-

- Retractable/Telescopic bollards - Features/Options:-
 - Galvanised steel to BS EN ISO 1461
 - Polyester powder coat finish
 - Stainless steel versions available
 - Round or square versions available
 - Reflective banding available in various colours
 - Standard and re-enforced versions available
- Most of the range has 'Sold Secure' status, with the products being tested and approved by the Police and insurance companies

When not required, the telescopic post can be effortlessly lowered and locked into the ground socket, contained in its housing and covered by a discreet flush fitting steel lid.

All Barricade Ltd's telescopic security bollards have a highly secure 10 pin push button lock, supplied with 2 keys as standard.
