

Barricade Ltd supply various types of fencing and railings. Fencing is probably the most common type of perimeter protection and is a must for securing sites and providing an effective means of restricting unwanted access.

Paladin type fencing

Features:

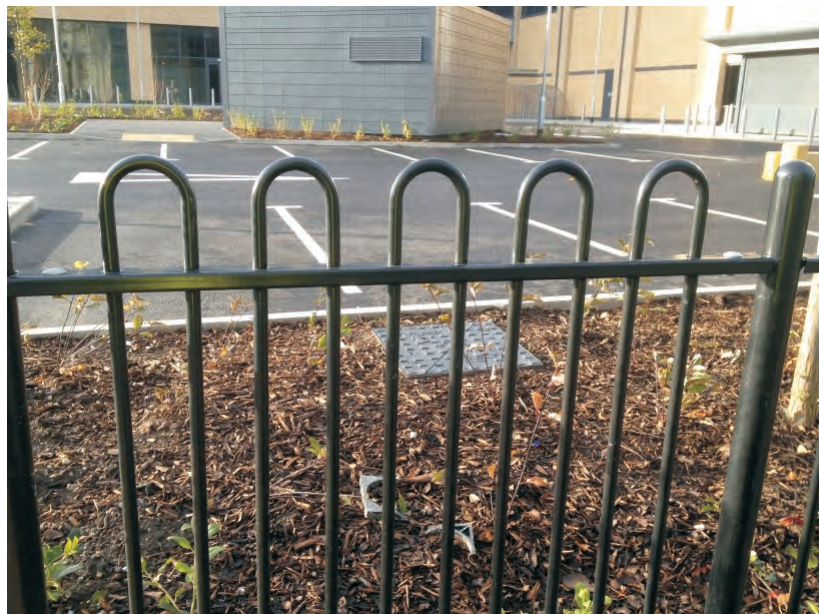

The panels have pressed 'V' beams which contain additional 4mm wires to give increased strength and rigidity. Mesh sizes vary to a maximum 50 x 50mm. Paladin has sophisticated good looks whilst providing a very secure fencing system.

Coating:

Panels are manufactured from pre-galvanised wires. An adhesion coating is applied to allow perfect adhesion with the polyester coating (min. 100 micron). Posts are polyester coated with a galvanized substrate in accordance with Euro norm 10147.

Colours:

Standard colours are Green RAL6005 and Black RAL9005. Other colours are available on request.

Bow top fencing.

Bow top fencing provides an aesthetically pleasing and safe means of perimeter protection. It is an ideal fixture on playgrounds or public gardens where safety is an issue, due to its rounded top.
