

Barricade Ltd supply street planters and troughs. The street planter can be seen on streets in city and town centres up and down the country. Street planters can be used to beautify an area, as well as offering ram raid protection and access control if positioned in strategic formations.

Our planters come in a wide range of sizes and depths, and can be used to display whichever combination of flowers or perennial plants that you so wish. Street planters offer a sturdy, attractive and practical access control solution.
