

Barricade's stainless steel seats and benches offer an attractive, strong and easy to maintain seating solution for a wide range of situations. The stainless steel seats and benches are available in a variety of designs and sizes.

Due to the nature of stainless steel, the benches are less likely to be vandalised. The low adhesion factor of the material makes the removal of graffiti much easier and the strength of the seating makes causing damage much more difficult.

Please contact us for more details on our stainless steel seating and benches range.
