

This range of bollards will meet all requirements to prevent unauthorised entry of vehicles or restrict access. The bollard is a heavy duty post that locates in a socket embedded into concrete. The post is locked in position by use of a socket flap and a padlock (supplied at extra cost). When post is removed socket flap can be padlocked in closed position keeping the socket free from rubbish when post is next used.

The removable bollard is available in three sizes:

- **Small:** For use in driveways, forecourts, etc.
- **Intermediate:** Car park use, town centres, supermarkets, garages.
- **Large:** For heavy duty applications where lorries, vans, etc. are involved*.

**Handles supplied on large bollard only, to assist removal of post.*
