

As a company we offer a variety of boot wipers and scrapers, that ensure the removal of dirt from all kinds of footwear and sport shoes. Our boot wipers are an ideal feature next to playing fields, public footpaths, park grounds and a whole host of other situations. The attractive and elegant design makes them a useful and aesthetically pleasing fixture.

Features / Options:-

- Durable, mounted 65 mm x 1 mm PVC brush to remove dirt from footwear.
- Boot scrapers to remove stubborn dirt.
- Powder coating options to any BS or RAL colours.
- Hot dip galvanising available on request.

'Solo' Dimensions: 950 mm high, 555 mm wide, 300 mm base brush.

Boot wipers / Sports shoe wipers:

Having a boot wiper next to a playing field or a golf course enables the removal of the majority of mud and dirt from all types of sporting footwear before returning to the changing room or classroom.

The design of the boot wiper means that it can remove dirt from any specialist sports shoe just as easily as it can from a rubber soled training shoe. The boot wiper is an ideal fixture for school playing fields and both amateur, and professional sports grounds.

'Messi' Dimensions: 800 mm high, 1000 mm overall width, 2 x 300 mm base brushes.
